International Equipment Company

A web site developed by a team for a company in Chattanooga, TN. The site was implemented using PHP, Smarty templates, MySQL, and AJAX. One of the main goals was to create a site that could be easily updated by non-programmers, thus most of the content is pulled from a database and can be easily edited by administrators.

SAU Book Trade

A web site intended to help students buy, sell, or trade textbooks. It is implemented primarily in JavaScript using AJAX to communicate with PHP scripts and a MySQL database on the server.

JavaScript Shrink

Parses JavaScript code and shrinks it by replacing variable and function names with shorter names, removing unnecessary white space, and concatenating strings. Also fixes errors like missing semi-colons and performs minor optimizations. Implemented in PHP.
